"Healthier Color of Face."

Dr. Julius Heitzmann reports the employment of **Pepto-Mangan** with much success in chlorosis and in cases of anemia in girls and women due to loss of blood, menorrhagia, metrorrhagia, inflammation of the pelvic organs, peri and parametritis or prolonged leucorrhoea. He says: "In almost every instance I observed within a short time increase of appetite, improved nutrition, healthier color of the face and increase of weight. I was surprised to learn how much more readily the **Pepto-Mangan** was taken than similar preparations, without ill-effects even after protracted use."—*Allgem. Wiener Med. Zeitung.*
