

pear trees for Pyra
a little too late in the
season they say for
results unless weather
cold, but it sure is
cold enough today with
strong east winds.

putting on oil. this
year one gallon to
20 gallons water or
about one 7 gallons
per tank. ~~out~~ on four
tanks today.

April 14th. milder today
had a shower in the
night but cleared up
about 10 o'clock. finished
spraying the pears it
took seven tanks.

April 15th uncovering
strawberries heavy

frost this morning.
and heavy cold north
wind blowing
April 16th uncovering
strawberries up & weather
cold yet. do not know
whether oil spray any
good on Pears for
Pyra or not. lots
of flies out today
and only sprayed two
days ago.

April 17th. cold east
wind & cloudy still
uncovering strawberries
some job to uncover
10 or 11 acres.

April 18. drawing straw ^{manure}
strawberries. weather
fair & cool. Jerry
arrived yesterday to work
again
