302 DAYS PAST

Tuesday

64 TO COME

Syphilo-Dermo-Urologic Aphorisms.

In washerwoman's itch, which is characterized by a thick horny epidermal layer traversed by numerous fissures that bleed easily, the best method of treatment is to apply continuously Hebra's diachylon ointment and prohibit the contact of the hands with water. This local treatment should be supplemented by proper internal measures and strict attention to a proper diet.—*Amer. Journ. of Derm.*

Weather

Temp.

Rained all night
& a little when I got up.
I took Maudie ^{Melba} & went
for her. Mr Young was here
building fence. Mr Box
helped John put in
tile before dinner.
