

Sunday, February 1

32 DAYS PAST

333 TO COME

Puerperal Eclampsia (Concluded)

9. Avoid undue forcing of hot packs for fear of heat-stroke.
10. Secure time for production of elimination by controlling convulsions with morphine.
11. Ordinarily the high blood-pressure needs no specific attention.
12. The successful treatment of eclampsia requires much personal attention by the physician.—Skeel; *Cleveland Med. Journ.*

Weather Rather cold

Temp.

Did not go to Church, nor the
children to Sunday school,
Nothing doing. Melba burned
her leg, with hot tea. Good wheeling
