187 DAYS PAST

FRIDAY

179 TO COME

Dr. Gabriel González—Concluded.

(nausea, pyrosis, vomiting, etc.), probably produced by the Cacodylate, together with the real symptoms of the disease—  
anemia. After I had remedied the gastric disturbance, I resolved to try **Pepto-Mangan**, giving at first very small doses, half a coffeespoonful, which, having been perfectly tolerated, induced me to use larger doses until the dose was one table-spoonful. This dose was retained always with perfect tolerance, and I had the pleasure of seeing my patient very much better."

A warm day. We had two swarms of bees.

Ellen came & took the girls & I out to see the little, baby sweet that was born this morning. John cultivated corn, Maudie went to Ayler & brought home one hundred bee racks  
Mariah &
