

February Wednesday 9 1927

Roscoe and Eric attended a U.F.W. executive meeting at mens school but I drove up and spent the evening with Jean. They had been to Brantford so she showed me some additions to her trousseau which included a hat that made her look more becoming than ever.

Thursday 10

Just 15 months this morning since I started working at Bendmore and I celebrated it by a holiday from piddling milk as I completed my term as pm "M. P." the day before. Put in the day helping Alex doctoring worms on the cattle in the morning and helping Eric in the dairy in the afternoon.

Friday 11

Went to Brantford in the afternoon for the first time with Alex after a load of pea ensilage which weighed 2570 lbs. Attended party at Gus Jeffers at night and as Jean was there to dance and as my feet were much better we saw had some nice dances together even if we were tired later. Home and in bed at 3.15. A.M.

February Saturday 12 1927

Not pretty good with only a little sleep. Alex and I went after another load of ensilage and brought home 2725 lbs this time. Had to stop twice coming home to adjust truck and then coming up the subway hill a porcelain in the spark plug blew up caused by a short circuit in the magnets. Drove into town with Rock at night and received final treatment on my wart at Dr. Munro's office.

Sunday 13

We Bendmore boys all slept in until 6.35 A.M. Helped Eric on the milk route and was through delivering just 3 hours and a half from the time we landed in town. Spent a busy afternoon in the dairy spent a very pleasant Sunday evening with Jean which more than made up for the pleasant drive. Had going home. My last drive right drive back to Bendmore and by all means the worst car I looked like a snowman and was good and wet when I landed home at one o'clock.

Monday 14

Helped Roscoe draw out manure in the morning and in the afternoon Alex and I cut logs down at the Vanatter farm and Roscoe drove a load of them to town. Rather tired at night so retired early.
