71 DAYS PAST

295 TO COME

The Principal Requirement

in conditions characterized by general constitutional depression is systemic revitalization. This is especially true after Prostrating Infections. Pepto-Mangan (Gude) is a general restorative of marked efficiency, which acts pleasantly and certainly as a hematinic reconstituent.

Weather

Temp.

A fine & warm day  
snow has melted considerably  
but freezing again to night.  
Sheel came & bought little  
speckle & Brinny to day. I was  
sorry to see them go. John  
went down to Harpes to trap  
line a man, then to the <sup>Chinnis</sup>  
hole. Drew some manure this  
morning.
