Geriatric Aphorisms—No. 17.

Infectious diseases except such as develop in localized lesions as erysipelas, are rare and serious and do not run a typical course.

A recurrence of early tuberculosis is mild; a primary tubercular infection in old age is fatal.—Nascher; Amer. Med.

Weather

Temp.

A fine day  
not so warm. Mr. Schute  
& Mr. McConell helped  
John draw oats all day  
Melba ironed, Mauch's 10th  
Aug. 15, 1881. Mr. Dence  
& Alita have gone this  
afternoon, on a trip to see  
the girls out west. The  
canning house men are  
threshing peas at Adams  
Bingham's this forenoon  
Evlied & her young men  
have gone to the high school  
science.
