220 DAYS PAST

145 TO COME

Conclusions Concerning Anesthetics.

For routine work ether, by the open or drop method, is the safest and most satisfactory anesthetic, and in the usual run of cases in a hospital service the anesthetic of choice in from 70 to 80 per cent. of the cases. Ether should not be employed per rectum.—*Bevan; Surg. Gyn. and Obset.*

Weather

Temp.

Warm Rained several times
this morning & very hard,
didn't go to church. But the
Girls & Coelin went to Sunday
School. John went over to Mark's
this morning. Maudie had
her nose treated again to-
day. Alex-a telephoned over
saying, that it didn't rain
over their farm once. Mr & Mrs
Lance didn't come home
as they expected. Mark 5-
