

FRIDAY, AUGUST 16, 1872.

Day dry & warm, Rec^d forty Barrels Salt from Kingston
per Schooner - commenced painting the old House and
trying to rig up a little all over - There is so much to be
done and it seems so impossible to do it - we have yet a
great deal of fencing before the place will be at all respect-
able - our Cabbages are all destroyed by the worms - have pulled
them up and piled for manure - another summer's labor
gone and for naught - A British Menagerie exhibits in
Kingston today - but did not go down to see it -
