121 DAYS PAST

TUESDAY

245 TO COME

Severe Destructive Blood Infections,

such as that of malaria, induce marked anemia, with a distinct loss of hemoglobin. **Pepto-Mangan (Gude)** builds new erythrocytes rapidly and certainly, and aids materially in the desired increase of hemoglobin. No untoward effects upon appetite, digestion, nor any of the vital functions are ever noted as a result of its administration.

Weather

Rained a little Temp.

We all went over to the boxes
& night, John & I went
girls didn't, they had a
surprise for each, John
towed the little garden
by the pond.

Mariah &
