159 DAYS PAST

207 TO COME

After Expelling the Parasite.

A physician from the hookworm country writes: "In the anemia of weak and delicate children infected with hookworms, I find that, after removing the parasite, an immediate following of the treatment with Pepto-Mangan (Gude) gives very satisfactory results."

Weather

Temp.

Rained last night
& all day (poured down)
We have one field to
low yet. Maudie took Melba
& went for her. Nothing
much doing only wading
through mud, ankle deep.
We have been craching
the biggest part of the
day. News reached here
yesterday that Lord Kitchener
was drowned. Mirals 10
