160 DAYS PAST

206 TO COME

March 14, 1907.

Dr. Jas. F. Booth, Transylvania, La., says:

"Sample of Pepto-Mangan received and prescribed same to a patient who was very anemic from loss of blood, due to a recent abortion, with loss of appetite and very nervous. Patient reported a few days ago and has gained several pounds; has a splendid appetite, rests well at night, and the marked anemia is fast disappearing.

I think your preparation a splendid addition to advanced medical practice, as it seems to be a true tissue-builder, and the most delicate stomach will tolerate it nicely."

A fine day sprinkley a
little to night. Maudie
stayed to Mr Beverlies all
night, & went to St Thomas
today had a fine time
& went to Market. They
came & brought her home
to night, after going to Aylmer.
Left old Mariah out for
the first Eugene was here
for dinner
