

went over and was over there till dark. We had to fill the tank at the flume and it took a long time to steam the line in so it was late when we got started and then the thing got plugged up so we had to quit. I am sick of the job.

Sunday July 14th

Tid. and I drove down to Sunday School this morning and both of us went to church. I drove Auntie Alice over here after church and Jack Martin brought Auntie and Tid over in the car. Auntie Ada has gone up to the Dawlley's for a week. Mr & Mrs. James Dany has been here when we got home and we spent the afternoon showing Jimmy the stock. He didn't like the old ram on account of his high shoulder and the black sheep but thought the calves were fine. He thought the pure bred calf was better than Knockferna as she has dairy looks. Aron Millman was over in his car this afternoon and brought Nita, Kathleen, Towser, and a Mr. Gait. They all came up from Toronto last night and are going back to night except Kathleen & Towser who are going to stay in Dover for a couple of weeks. Aron took Mrs. Douglas and the rest of the ladies down to Auntie's and ~~we went~~ Dad, Frank and I went in Douglas's

car up to Ham Thompson's and had a look at his stock then went down to Auntie's. The Douglases left before tea and we all stayed at Auntie's for tea and Enah stayed down to church but the rest of us came home to do chores and Dad drove down for Enah when we got through. Fine

Monday July 15th

First thing this morning we gave all the lambs a dose for tape worm using Cooper's worm tablets. Then Frank harrowed the orchard and Dad and I went back and turned out two or three rows of hay cocks. It is all pretty damp and blackened but not musty. When we were going back we saw Pommers pull his foot out of the barbed wire fence along this end of the woods near Charlie Munroe's line and when we went over we found his foot badly cut at the back and above the hoof, but we didn't bring him up as Dad thought he would be better back there if the joint isn't cut into. We couldn't get close enough to him to see. This afternoon we got in a couple of loads of hay. Tonight Frank and I went over to the potato patch it was too late when we got over to spray and we found them all playing foot ball. Tige Mc Bride said he would help spray to morrow night. Fine day.
