61 DAYS PAST

Saturday

305 TO COME

**The Cellular Elements of the Blood**

must be fortified in order to bring about any substantial improvement in cases of Anemia, Chlorosis, Marasmus, etc. Therefore some agent to create red cells and hemoglobin is urgently indicated. **Pepto-Mangan (Gude)** promptly and efficiently fulfils this imperative therapeutic indication and, at the same time, acts as a general restorative and reconstituent.

Weather

Temp.

Cold this morning but thawed a little this afternoon. Rained hard last night & lightened. The lightning struck the lumber over the creek, at Eugene Mandies place hurt her badly today. Her box was over this afternoon. Cecil was here this forenoon. We were all home all day. Eugene's horses got in his barn & ate so much chaff Dr Pickering was there & says they will come all right.
