

Friday July 21<sup>st</sup>

Daddy got up some time during the night and wet out and raked up the alkali while the dew was on. He got through and came up for his breakfast about eight o'clock leaving the rake back there for Lambkin's. I was not waked till after six and did not get up till half past. Bill had the cows in when I went out and was milking Spitz. I milked Bobby but left the milk to separate after breakfast. Bill changed the car and hay fork from the drive house into the barn. When Daddy got through his work we went out and huckered up the alkali. The ground was covered with husks and the stuff was soaking wet. but we chucked up hushes thick all over the field and were up at the house at 11:15. Then Bill and Daddy

went out and got on a load of wheat before dinner. I sawed some wood mowed lawn and watered Joe and Ginge while they were gone. They hauled wheat all the afternoon. 3 out of the east field and one out of the west. I just helped them pitch off and hoed corn and read while they were out. I felt a little sick the second load and just lay around till the last when I hoed some corn. I turned the sheaves for Daddy to mow away.

When we came out after tea we found Nese's little sow and all her pigs out in the back yard. Then Dick and I undertook to get them home. We got them down pretty well as far as Bannister and there the sow went through a hole in the fence and the two Bannister's Coram Rankin and Paul Lee Woodson helped us chase her out of there. Dick and the Bannister's chase
