291 DAYS PAST

THURSDAY

75 TO COME

Direct Hematinic Medication.

If there is any one condition in which prompt hematogenesis is indicated it is in Post-Malarial Anemia. As soon as the plasmodial poison is neutralized, **Pepto-Mangan (Gude)** should be given in full dosage. Both the iron and manganese in this preparation are in organic combination with peptones and are easily and promptly absorbed, without causing digestive disturbance or constipation.

Weather

Temp.

Very foggy this morning
fog came down like rain
turned fine & warm, I
washed & ironed, Melba did
the other work, Maude is
better but not up. Maiden
Doris is very ill with Phemaria
Dr. McLaughlin was there & here
also. Melba & I have picked
some apples, John ploughed
& is over to Clarence's house to
night. Billy Dennis was here
& got apples.
