

Saturday June 2nd

I spent the forenoon working in the garden & got most of the small seeds planted. Tom came over and got the team to work up his garden and this afternoon went down town after some feed. I went down town this afternoon and was very much relieved, gratified and delighted to discover that Dad had balanced up my next thing to - extend bank account. by depositing 1000 bucks to my credit. I spent the rest of the afternoon paying up bills. I forgot Aunty Alice's butter so came back after it and by this time I got home to stay it was after six. I stopped on my way home and got about 40 tomato plants & 20 cabbage plants from Mack Ward, and just as I got home Charlie Shand drove in with 250 strawberry plants that I had asked him to get for us. I changed my clothes and got Bobbie repaired then started planting. Mary took the blossoms off the strawberries and the kids carried them home and by working till nearly half past nine & by moonlight I managed to get them all set out. I then milked and had my supper. Gay & the Wumpus got the nail scissors yesterday and haggled a lot of their hair off. It has been cool and cloudy all day.

Sunday June 3rd

Didn't get up very early this morning but managed to get some lawn cut and get to church. I went down alone. Went down to Aunty's for awhile after church. Aunty is in bed with a bad cold and neuralgia. Dick gave us an exhibition of golf ball driving with his new clubs. He has just joined the club in Brimco. The Bagley's all except Essie came out for awhile this afternoon but I am afraid I hastened their departure by disagreeing with Mr. Bagley over the Canadian Government's attitude towards run-runners. He said he was ashamed of the country he lived in for allowing the Customs officials to clear run boats for American ports. I told him I didn't consider it our business to enforce American laws. When they left we all took a walk over to the school house to see their new flower beds and then we drove over to see the new colt at Louis. Froze last night. Cool all day.

Monday June 4th

Was up betimes and sowed some beet and parsnip seed, went over to Mrs. Lansk's and got some tomato, cabbage & pepper plants she had for us and set out the peopas & cabbages all before breakfast. Tom came along
