104 DAYS PAST

Sunday

262 TO COME

Gynecological Hints.

A warm vaginal douche should be at least four quarts in amount and of a temperature of from 110 to 120 degrees F., usually 115 degrees F. It is well to add a heaping table-spoonful of common salt to each two quarts of a simple douche. This should always be given at a time when the patient can remain in the recumbent position for at least an hour.—*Int. Journ. of Surg.*

Weather

Temp.

Didn't rain
d & night it is a lovely
moon light night, but the
roads are a fright. Melba
& I went to church, and
sat with Mrs Powl & Edna
Grace came over to
night.
