## To Repair Blood Damage.

Timely hematogenesis is required to repair the damage to the blood caused by septic infection and its devitalizing influence. Post-septic or post-suppurative anemia is usually quite apparent if the infection has been at all prolonged. **Pepto-Mangan (Gude)** is both prompt and efficient in blood building therapy and is always well taken, rapidly absorbed and readily tolerated.

Weather

Temp.

Rained very hard about  
noon or a little later, had to  
quit work. Aunty Teeple canned  
raspberries for me. He was still  
home, all day <sup>only</sup> John went  
to Marks for a little while to  
night. John cut some more  
out his wheat this four noon  
not finished yet.
