

Monday Saturday April 9<sup>th</sup>  
Dad. went down first thing this morning and  
brought Auntie over to play with Sid. They have  
been planning & plotting all week to go to the  
woods to-day - but the best laid schemes of mice  
& men having a habit of going a-glee at times they  
acquiesced the time by playing back & school all  
morning and Sid. at least seemed to enjoy it; he  
spoke of going to the woods but Auntie assured him  
that it was too wet. Frank & I sheared the three yearling  
lambs to-day but didn't try to do any more as they  
didn't shear very easily. Frank telephoned Jeff to other  
night and he sent down the wool sack and twins yesterday  
by express. Lual drove Auntie down town this afternoon  
and Marij. got tea ready. I went down town to night  
and had a meeting of the June's days. It has been fairly  
cleared up to-day but rained a few showers. Freezing to night

Sunday April 10<sup>th</sup>  
Marij. didn't feel like walking down this morning so  
Frank Sid and I went to Sunday school and none of  
the other come down to church. This was Mr. Johnson's  
last Sunday. I had to go up to meet Frank Smith & Jack  
King about the father & son banquet on I-lus day night.  
and it was one o'clock when I got down to Auntie's &  
hadn't intended staying but had told Frank he

might as well but when I got down there they were just  
sitting down so I had dinner with them and come home  
immediately afterwards. Dad. & I did up the Chares and  
then read for awhile this afternoon. Frank came home before  
tea but went out to the Sid ways after tea. Dad. went  
down to Auntie's this evening. Uncle Ward. came over  
this morning to get ice to make an ice pack for Ade  
who has been very sick with intense pain all  
night and is not much better to-day. They are  
afraid of appendicitis. Fair but cold wind Freezing to night

Monday April 11<sup>th</sup>  
While we were at breakfast this morning Palmer the man  
came over to see if we wanted any turnips he has some  
spitted which he is selling for 10 cts a bushel so Dad. told  
him we would take a load. Frank and I spent quite a  
bit of time this fore noon docking the eldest lambs. I  
also took my little chickens out of the loft and put them  
out in the Rasp berry patch. There were 29 of them and  
I put them under two hens. Three hens hatched them  
and I put the third one in the chicken yard but she  
got out and to-night the three hens were mothering the  
batch between them but as they were quiet with each  
other I left them alone. Frank and I went over to Palmer's  
after dinner and got the turnips. His garden is above the  
brick yard and he was out there sowing onions.
