173 DAYS PAST

192 TO COME

**The Hemic Murmur, and the Venous Hum**

indicate a distinct anemia, the character and extent of which may be determined by examination of the blood. A therapeutic quartette of marked value in such cases consists of fresh air, nourishing food, rest, and Pepto-Mangan (Gude).

Weather

Temp.

We did not wash  
Melba wheeled to school  
I went back in the field  
and got strawberries for  
Maude's breakfast.
