Local Anesthesia in Rectal Work.

By far the best local anesthetic to use in operations on and about the rectum is a one-fifth of one per cent. solution of cocain. This enables one to use fairly large quantities with no danger to the patient. Always have the solution freshly prepared.—*Med. Sentinel.*

Weather Cold all day Temp.

Rained last night. John thrashed for Lewis this forenoon & Eugene was over for dinner & took his furniture. Come John went with him as far as Kingsmill & got his chairs. I took the girls & went for them, got a basket of peaches
