194 DAYS PAST

FRIDAY

172 TO COME

Anterior Weak-Foot

or sinking of the transverse arch through the heads of the metatarsals, is a cause of painful feet often overlooked and mistreated by the application of the usual flat-foot arch. It is not difficult to recognize objectively; subjectively, it is characterized by pain in the toes. It is apt to be marked by plantar callus.—Amer. Journ. of Surg.

Weather

Temp.

Warm Sun

Shining part of the time & part cloudy Eugene & his man Philip Parker came this morning & helped John with the hay with their hay loader, Mr. White helped also, & Miller drove the horses. Maude took Mr. White home & went down to Blake & Millers man //

I was to King's mill for a barrel salt, some

hundred of sugar took off
