146 DAYS PAST

220 TO COME

In Treating Syphilis, Please Remember.

Some physicians are so anxious to obtain a negative Wassermann that they forget to treat the patient. They stuff him with mercury and salvarsan, forgetting that the patient's general system needs watching and strengthening and toning up. Specific anti-syphilitic treatment is the most important, but general hygienic measures must not be neglected.—*Critic & Guide.*

(**Pepto-Mangan (Gude)** is an ideal hematinic tonic in conjunction with specific medication.)

Weather

Very warm

Temp.

Heurb came over this morning with Eugene's team & Cecil came & John worked.

Billy & the Black colt the colt is three years old & they put in the field east of the garden, the first that we have seeded this year Eugene & Al + was here for dinner on their way from ^{at lunch} _{Mariah}
