353 DAYS PAST

12 TO COME

To Hasten Grippe Convalescence.

While opinions may differ as to the treatment of La Grippe during its active period, there is no doubt of the necessity of supportive and tonic treatment during convalescence. **Pepto-Mangan (Gude)** is especially valuable in such cases. When prostration is extreme it is a good plan to order strychnia, in appropriate dosage, in combination with **Pepto-Mangan (Gude)**.

Weather

Temp.

Snowed all the
forenoon as nearly and
-last- enough! - good sleighing
In leaves birthday & they
are all coming over for
tea. Eugen & Aleta
were here & Carlton also
