129 DAYS PAST

WEDNESDAY

237 TO COME

A Stimulator of Hemic Vitality.

The Bloodlessness of General Devitalization, or what is sometimes termed Nutritional Anemia, requires special dietetic attention. In addition to this a stimulator of hemic vitality, such as **Pepto-Mangan (Gude)**, is distinctly useful for the purpose of encouraging hematopoiesis and acting as a general tonic to both blood and tissues.

Weather

Temp.

Rather a fine day, but cold. I went to Aylmer with the girls to get some books & paper the summer kitchen & road home with Billy Davis. Mella had the little Simpson girl bring her home to bright. Maudie stayed to take a French lesson. John has been for corn. Mark & Cecil took a load of straw to Aylmer Cecil was cut this afternoon again & again tonight. B. J. M. G.
