

FRIDAY

Sunday, April 5

Eggs 48

96 DAYS PAST

270 TO COME

March 19, 1907.

Dr. P. S. Bone, Lancaster, Ohio, says:

"I used the bottle of Pepto-Mangan (Gude) which you sent me, in the case of a ten year old girl, who was very anemic and had lost appetite and flesh, and was bothered much with nervous cough. I did not expect to benefit the cough, but the girl began to eat better and in a short time gained rapidly in strength and flesh, and now looks well, and to my surprise the cough has nearly disappeared."

Good Friday, a terrible  
one snowed all day &  
thawed, the mud is a  
fright. Maudie & Melba  
are both ill. Melba was  
up & helped to do some  
of the work, but had to  
go back to bed again  
she was all frightened  
to night about Albert as  
he didn't come home to  
shed on time, but he turned

up all night
