

Saturday October 14th

We first did chores this morning and oiled the buggy and this afternoon I got down town by some after me and got Miss M. Owen and Marjorie and went to Vittorio's after chest-nuts. We went up to Ferrer's to try the woods that Helen Dunkin told me the big nuts were in. The woods are across the road from the house and in front of them but two or three fields back, and there is a lane in to them. We drove up in the lane and tied her behind a clump of trees out of the wind and sight of the house. We trailed all through the woods which was nearly all chest-nut trees but never found a nut but coming out we struck a little tree along the fence that was loaded and the husks open I climbed it and shook them all off and they picked up enough to satisfy them of big nuts very big ones. We then went up to Charlie Dunkin but he wasn't home, we tried a couple of other trees but didn't draw much in the way of nuts. I also took a couple of pictures and so did Mary. I didn't get home till nearly eight. Colder to day.

Sunday October 15th

I went to church this morning but none of the rest did. Dad, Ench and the baby went out to Suppers for dinner. Frank had to do. Ben's chore

but came down town for dinner. We then went to Auntie's for dinner. I was in the drug store all the afternoon listening to Dr. Kelley expound his religion which is interesting though heterodox. At four o'clock when Ben was relieved at the telephone by Gelly, Bob, Johnnie, Said, Davis, Pansy, Tracher, Arlo, McCarter & I walked around the hill and I went to Auntie's place. Auntie went to church to night and afterwards I went home with Mary who to my delight and surprise consented to go to the picture show on Tuesday night. We had a new preacher to day a Mr. Wright from Huron College. He wasn't bad till he got excited and then he went wild. To night he was very much wrought up over some of Pastor Russell's literature which had been circulated about town during the afternoon. It has been a lovely day.

Monday October 16th

I took the cross cut saw over to Uncle Ward to sharpen and went on down and got him a file to do it. I then went back and cut the corn down at Auntie's and stayed there to dinner. This afternoon Fred and I cut up some of the elm logs which he hauled up from the gully Saturday afternoon. Ench went down town this afternoon to get some things for Frank's birthday. Will & Clancy
