

HOW?

does the physician determine the merit of any medicinal agent?

HOW does he separate the valuable medicinal wheat from the useless therapeutic chaff?

HOW does he choose his therapeutic working tools?

The ACTUAL, EXPERIENCE of medical men for more than seventeen years indubitably establishes the sterling hematinic and reconstructive virtues of

Pepto-Mangan ("Gade")

in Anemia, Chlorosis, Hemic Devitalization from any cause and in General Systemic Denutrition.

In original bottles only. Never sold in bulk.

Samples and literature upon application.
