202 DAYS PAST

164 TO COME

Diabetes in Children.

Children of school age while in the full bloom of youthful vigor may develop a malignant type of diabetes, says the *Medical Record* for September 12, 1914. In this country at least these cases seldom come to autopsy, nevertheless there is every reason to believe that the actual disease is pancreatitis, the diabetes being the clinical expression. Knowledge of the causation of the pancreas lesion might lead to the use of prophylactic measures or at least prepare for a tragedy.

Weather

Temp.

Very warm

Men drawing in hay
Albert helped in the
afternoon. After tea girls
& I went to Kingmill
then drove up to Mrs
McLays farm. Mella crocheted
half of the evening yesterday
▽ finished it today
Doc + Stanley picnic today
