

Monday August 6th

We all went out and cocked up this morning and finished the field by about eleven, we then come up and put the car up in the horse stable now and Frank put a roller out of the old lawn mower on the out side of the barn just below the hole that the big rope goes out to keep it from scrubbing on the ends of the boards. This afternoon we hauled in four loads but left the last one standing at the end of the horse stable. So right Frank and I took Queen around the block past John Wess's. Rained a very small shower last night and looked rainy this morning but clear.

Tuesday August 7th

We just got in three loads of hay this morning, as mow is getting full now and it takes time to get up mow it. This afternoon we got a load and a half of good hay and put it in the horse stable but the last load was composed mostly of couch grass so we hauled it in to the barn and left it to put in the bottom after hay and over rails to put the wheat on. We got through early and I and I took Queen around the block, we took the horse with us. It has been cloudy and cool all day and this afternoon there was too much wind to load hay.
