99 DAYS PAST

MONDAY

267 TO COME

"Feeding" Rather Than "Drugging."

Devitalized red cells, from whatever cause, need reparation and reconstruction. The administration of **Pepto-Mangan (Gude)**, regularly and continuously, constitutes a "feeding" rather than a "drugging" process, as it supplies the erythrocytes with the essential vitalizing hematics, iron and manganese, in palatable, tolerable, non-irritant, non-constipating and promptly available form.

Weather

Temp.

Cloudy & cold to cold
 that John had to wear his
 over coat. To cultivate
 started seeding this morning
 Mr. Revells came for a load
 of hay. Boyde & his father
 brought me a load of boxes
 & then gathered up the 2 of
 buckets this afternoon they
 came & got a load of
 wood out of the orchard. John
 has gone to rig out for his
 clover seed. Maude's new
 school alone helped & I washed his
^{weeks} washing Maude, 12
