40 DAYS PAST

Sunday

326 TO COME

A Non-Irritating Depilatory.

Depilatories containing the sulphides of barium, strontium and calcium and an inactive substance like chalk, talc or starch are extremely irritating to the skin. This can be avoided by preparing them *hot*. To prepare such mixtures 1.5 grams of strontium, or an equivalent quantity of barium or calcium sulphide, are triturated with 2 grams of starch and 8 grams of water and the mixture heated to boiling, with continuous stirring. Upon cooling, a creamy mixture is obtained, which is as efficacious as the mixture prepared in the cold and does not hurt the skin.—*Med. Brief.*

Weather

Temp.

cloudy snowed
a little off on snowed some
last night. but of no account
have Applesford brought
to my tent & that Helba went
to church. Been a high
fly day. John went on
mag with Belley this afternoon
& to night is gone
