89 DAYS PAST

277 TO COME

May 26, 1907.

Dr. José Vila, Havana, Cuba, says:

"I have no hesitancy in expressing my preference for **Pepto-Mangan (Gude)** over other ferruginous preparations, prescribing it in the majority of cases of chloro-anemia with amenorrhea or catamenial irregularities, and above all for adolescent women." -

A fine day John had
Albert & I had here all day
& help him split wood, &
Clarence & Mark helped this
afternoon. Girls drove to
school. We ordered three
bags of granulated sugar
at eight - twenty. We put
the pork to dry 1/2 day; I
boiled in two quarts of
syrup.
