

down town and got some salt for Dad. and stopped
in at Aunt's and got the remainder of our Christmas
presents. Mabel was in for a short time this morning Fine day

Tues day December 28th

Did. Chares and worked for a very short time at the
Chicken house. This after noon went up to Harvey Shanks
help audit the school books. Bill Donald consented to be the
other auditor and we waited about an hour for him and
then Glossie and I went at it. and Bill came before we finished.
He had been delayed by taking Lloyd Ryer to the doctor.
Lloyd jammed his finger while fixing his pump and the
doctor at first thought it would have to be amputated but
put 12 stitches in it instead. We found the books correct
although the bank balance was about twelve dollars shy
and as Harvey draws cash from the bank to pay small
accounts, we didn't know how to locate the trouble. Mary
has had a time with the baby. She has been sick all day
and was sick at her stomach at noon. Mary had to sit and hold
her all the after noon. Very mild & cloudy. snowed a little.

Wednesday December 29th

We both got up about 3 a.m. with Gay who was

sick at her stomach. and I stayed up. holding her part of
the time. she had a very distressing time and has been fretful
all day except when she was asleep which was a good
deal of the time. The baby was sick again too but they both
seem better to night. I got a little more done at the chicken
house this fore noon and Mary, Harry B and I drove down
town this after noon. Ina was here and she looked after the
other two. Mary went up to see Glad. Law and I went to Bill
Tring's and got my feed accounts straightened out. I kept
kept track of what I got since last fall. I drove Ina home
as soon as we got back here. A little colder to day. Cloudy

Thurs day December 30th

We sent Harry B. over to the Lamphins first thing this
morning to see if I could have Doc & the wagon to haul
coal. He brought back word that I could as I took Doc
and went over. I got home about noon with a load of
chest nut. and went back and got a load of store coal
this after noon as they say it burns much better in the
heaters than the chest nut. I went by the farm this
morning and got a bag of wheat and George got me to
bring back some lumber for him. I got a bush of chaps
at Betty Lamps and a bag of salt for Doc. I also
