

...to be ...
...all day and ...
...had ...
...for ...

Wednesday Sept 13th

Went and started to cut corn this morning
Daddy kept on cultivating all morning
The drill came up this morning and I
sowed his wheat this morning
Daddy and he said he would draw it
in the field over the gully after dinner
So this afternoon Daddy took wheat
over in the wagon and I went with him
Daddy got there at the same time. The contractor
Hillyer belonging to the Norfolk Gas Co. was
facted and pulled up in the gate
They had to run out of the pond
shortly after was Mr. Johnny Walker
and Alfred Miller came along
Johnny's dog and they barked at him
Daddy kept on working till afternoon
I stayed with him till 5 o'clock
then went on cutting corn till about
five when I came up and did the
chore. I got about 12 shocks out

of the morning I only got two or three made in the afternoon in 1
at late in the I departed. I'd get to rain about 10 o'clock so
some of the had to change. The fairies were over
the gun back this afternoon but did not get a shot
he'd cut all day but was a white frost last night but it's
and warm
Daddy

Thursday September 14th

Got up good and early and then
found the blooming cows had gone back
and did not stay very long in the road
the other side of the wheat ground across
the gully. I followed them till they were down
into the gully. It would take too much
time and space and I might succeed
lots of my chase but I got them up
with the help of Daddy and as yet
milked soon after 8 o'clock. Daddy
finished sowing the wheat this morning
and I got a bin of shacks right
through to the fence. This after
noon I cut some wood cleaned the
gas, hunted for a rasp to sharpen
my hoe with for about half an hour
and then went back to cut corn. Daddy
was running out furrows and ditches
all the afternoon till dark. Mr. Dabie
came over and helped him most of the
