40 DAYS PAST

325 TO COME

Danger Signals of Cancer.

(1) Cancer of the breast: The danger signal here is a small lump. In a woman over 35 or 40, this is cancer in at least 90 per cent. of cases. To wait a month to see if it grows, or shows signs of a cancer, is very likely to mean the woman's death in a short time.

(2) Cancer of the uterus: The danger sign here is slight bleeding at irregular times, or any bleeding after the menopause.—*Childs.*
