88 DAYS PAST

Friday

278 TO COME

**Surgical Suggestions.**

When a foreign body in the nose is not easily removable with forceps, remember Félizet's simple method—the injection of warm water into the opposite nostril. Use a syringe or douche nozzle that snugly fits the naris. Begin gently and slowly, then increase the force. As the resistance suddenly ceases, the foreign body is shot out (or at least is dislodged) by the pressure of the fluid reflected from the posterior wall of the pharynx.—*Amer. Journ. of Surg.*

Weather

Temp.

cold raw north  
west wind, but thawed  
a little. Mauchie & Grace  
went to school, & Melba sent  
& took her music lessons.  
Mrs Appleford came for  
Grace & had her supper  
& brought my syrup, three  
gallons. John went for  
the girls & to see about a  
hamass. Mark was over & got  
some eggs to sit.
