53 DAYS PAST

302 TO COME

Post-Septic or Post-Suppurative Anemia

requires timely hematogenesis to repair the damage to the blood caused by septic infection and its devitalizing influence. Anemic devitalization is usually quite apparent, if the infection has been at all prolonged. **Pepto-Mangan (Gude)** is both prompt and efficient in blood building therapy and is always well taken, rapidly absorbed and readily tolerated.

Weather

Temp

I took the girls & Aleta,
Went for them. Clark Marshall
came about 8:00 with the
engine, and after dinner
we cut wood. Lewis run the
saw Mr Baker threw away
sheds to Clarence & Carl &
Eugene & John put up the
wood. Eugene was away
John got him some new
rubbers & overalls.
