247 DAYS PAST

118 TO COME

**A Steady and Speedy Increase**

in the percentage of hemoglobin is the general rule when **Pepto-Mangan (Gude)** is regularly administered. The number of red cells is also increased and both the subjective and objective symptoms due to anemia are rapidly relieved. Patients of all ages readily take **Pepto-Mangan (Gude)**, because of its distinct palatability and ready tolerability by the stomach.

**Weather**

**Temp.**

Eugene & Eugene  
went to the north place  
& had their dinner for  
the first time, but came  
home at eight. I went  
down to Mrs Marchant's  
for elderberries, John was  
over to brook. This morn

Billy  $1\frac{1}{2}$  Neddie  $1\frac{1}{2}$
