255 DAYS PAST

WEDNESDAY III TO COME

May 4, 1907.

Dr. S. H. Britton, Marion, Ohio, says:

"I have had considerable experience with **Pepto-Mangan** (Gude). As to palatability, certainty of action, etc., it is certainly superior to any ferruginous preparation that I know. That it is assimilated readily, I am sure, because patients invariably gain in strength and improve in appearance."

A little warmer, but  
froze last night. I  
washed & canned some  
corn. Had seventeen  
quarts. Cecil & Evelyn  
& her young man went to  
London fair to day. John  
Clarence & Mark drew two  
loads of oats, Clarence  
charged eight dollars.  
Melba is some better.  
Eugene went to London  
fair last night. Isaiah 5.
