56 DAYS PAST

Tuesday

310 TO COME

"Don'ts" in Appendicitis. No. 2.

2. Do not treat medicinally if the patient happens to be a child; peritoneal involvement and abscess formation are very early features in children.

3. Do not confound appendicitis with Dietl's crisis, typhoid fever, hip joint disease, stercoral typhlitis, intestinal lithiasis, intestinal obstruction, cholecystitis with distention, perinephritic abscess, tuberculous peritonitis, extrauterine pregnancy, renal colic, carcinoma of the cæcum, hypochondriasis and hysteria.

4. Do not diagnosticate appendicitis if pressure along the descending colon causes no pain in the right iliac fossa.—*Chideckel; Med. Record.*

Weather

Temp.

cloudy but snowing
warm. Melba took Grace
& I went for her, was in to
see Maude Thompson on my
way down. I was in & the Drs
Melba did nearly all the
morning John took Dr Pickering
a load of oar's, & was down
to Shedd's this afternoon.
Melba & I was going to the
Baptist tea but it snowed
so hard we didn't go. Billy's
Marah &
