218 DAYS PAST

MONDAY 6

148 TO COME

May 7, 1907.

Dr. R. W. Halladay, Daysland, Alta., Canada, says:

"Sample of Pepto-Mangan and bacteriological chart to hand. The latter is certainly a work of art and an ornament to any office.

The Pepto-Mangan I took myself, being run down to some extent, with exceedingly beneficial results. I am prescribing Pepto-Mangan continually in my practice."

Very warm all day. John and Mr. & Boyd Younge are here this afternoon helping in the haying. John raked this morning. Fred Groberg was here for dinner. John cultivated the potatoes. Thus ended the day.
