19 DAYS PAST

347 TO COME

INCOMPATIBLES.

Thymol is incompatible with acetanilid, antipyrin and camphor, also with chloral, menthol, phenol, salol and urethane.

Salol shows some chemical change with antipyrin, camphor, camphor bromide, chloral, phenacetin, pyrogallol and thymol.

Resorcin forms new compounds with acetanilid, camphor, monobromide, naphthol, menthol, phenol and urethane.

Pepto-Mangan (Gude) increases the amount of hemoglobin and builds rich new blood.

The wind is blowing & it is very cold. John took Mariah & went for his sleigh. John helped Mark butcher his pigs
