358 DAYS PAST Sunday 8 TO COME

The Dose of Digitalis.

Digitalis is almost always given in far too small doses. The best results are got from the largest dose the patient can stand. Cushny gives from one to one and a half drams, of the tincture, presumably, daily and continues these doses for long periods. There is no cumulative effect, and the patient will cease taking the drug when it begins to produce nausea.—*Cushny; N. Y. Med. Journ.*

Weather **Temp.**

A lovely day. Girls went to Church this morning then they came back to Abt's & we went down for dinner. To night John & the girls went to Church. Mr & Mrs Leet was here for the evening
