214 DAYS PAST

152 TO COME

Scrubbing the Field of Operation.

In cleansing and antisepticising a field of operation, always begin at about the center of the proposed incision and scrub outward in circles. In this way the dirty water and debris from the skin is washed away from the proposed field of operation, instead of being carried backwards and forwards from skin surface perhaps unscrubbed.—*Am. Journ. of Surgery.*

Weather

Temp.

Very warm but turned
cold along towards night.
Maudie & Nella came
home from Alitas & I
took Maudie to Aunty
Belines & is going
to Tilsonburg tomorrow.
I washed & John
finished cutting
wheat. Mariah 12
