

Post-Hemorrhagic Anemia

whether due to acute, exhausting loss of blood, or the more chronic hemorrhages of the climacteric, is a distinct indication for the use of

Pepto-Mangan ("Gude")

in full and regular dosage. It creates new red cells, increases the hemoglobin content of the blood and rapidly "makes good" the loss of vital fluid.

In eleven-ounce bottles only.

Never sold in bulk.

Samples and literature upon application.
