

to the trap and Charlie took them down. I was over
here telling them to watch for Charlie when Harvey
& Mrs. Evans brought poor old Dave home. He went
over there this morning to help them haul in oats &
had worked all day and to night fell off a load
and struck his head & shoulders on the ground. He
was badly shaken up and frightened and so
was Mrs. Lampkin when she saw him. I spent a
pleasant evening with the baby as she would not
sleep. I don't think there was any thing the matter
with her but I had her up most of the time. Mary
was away. Very hot & close all day, but much cooler to night.

Thursday August 27th

Harry B. & I drove over home this morning and we hauled
oats all day with two wagons as Cole was there and
we got in 5 loads. We cleaned the back field in
and got a couple in off the field east of the old garden.
Aunt, Aunt Alice & Phoebe were over there for dinner & tea
and we stayed to tea. Dad. said he was very glad he
went to Toronto yesterday so they all seemed so glad
to see him. They all told him that a letter Aunt had
written was the means of bringing them all up. No wind & cold

Friday August 28th

We hauled oats all day with two wagons, and cleared the
field east of the garden, there were 8 loads on it and
we burned about a load that was principally chaff. We
got 3 loads in off the field west of the lane. I rode
Queen home to night and ~~then~~ after tea rode her down to
a Horticultural meeting at which they decided to hold the
Fair on the 14 & 15th of September. Fine & cool. Mary had
a visit from Mrs. Cam. M. B. and picked about a
bushel of beautiful looking crab. apple.

Saturday August 29th

Harry B. and I drove over to the farm this morning
and got there just as they had the two last loads that were
hauled last night pitched off. The boys helped them put
them off. We got in four loads before dinner and
helped them put on two more after dinner and then
I came home and got Mary, Gay & the baby and we
went down town to do our trading. Cook & Harry B. went
down to see the deer and we picked him up on our way home
after dark. There was one more load of oats out when I
left but they got it in. I think that makes 32 loads
in the barn and they would average good loads. Much warmer fine
