277 DAYS PAST

88 TO COME

Poorly Nourished Children

require a reconstructive that is rapid and certain in its action. The organic iron and manganese in **Pepto-Mangan (Gude)** are so easily tolerated by the stomach and so quickly absorbed into the blood that the appetite returns, the color improves, and strength and weight increase rapidly and appreciably.

Weather

Temp

Warm & looked like rain all day but kept away until about six to night. I washed all alone don't think I will do it again very soon. John went to Kingson ill after he came from the factory & got a bag of salt then drew manure the rest of the day. Girls drove to school I stretched my up stairs window. Curtains no standing gone the girls two prim roses.
